Scent merges the precision of a technical product with the warmth of an art object. Its design draws inspiration from the sophisticated aesthetic of perfume bottles: the precious embossed glass facets play with reflections, transforming light into a living matter that vibrates within the space like an impalpable fragrance. Thanks to a color palette conceived as a true design tool, Scent allows every space to be dressed with a unique identity, offering absolute visual comfort and a soft aura that, much like a perfume, leaves an invisible yet memorable imprint. Anti-glare honeycomb as standard.
