

SCENT COLLECTION
by Marc Sadler, 2026

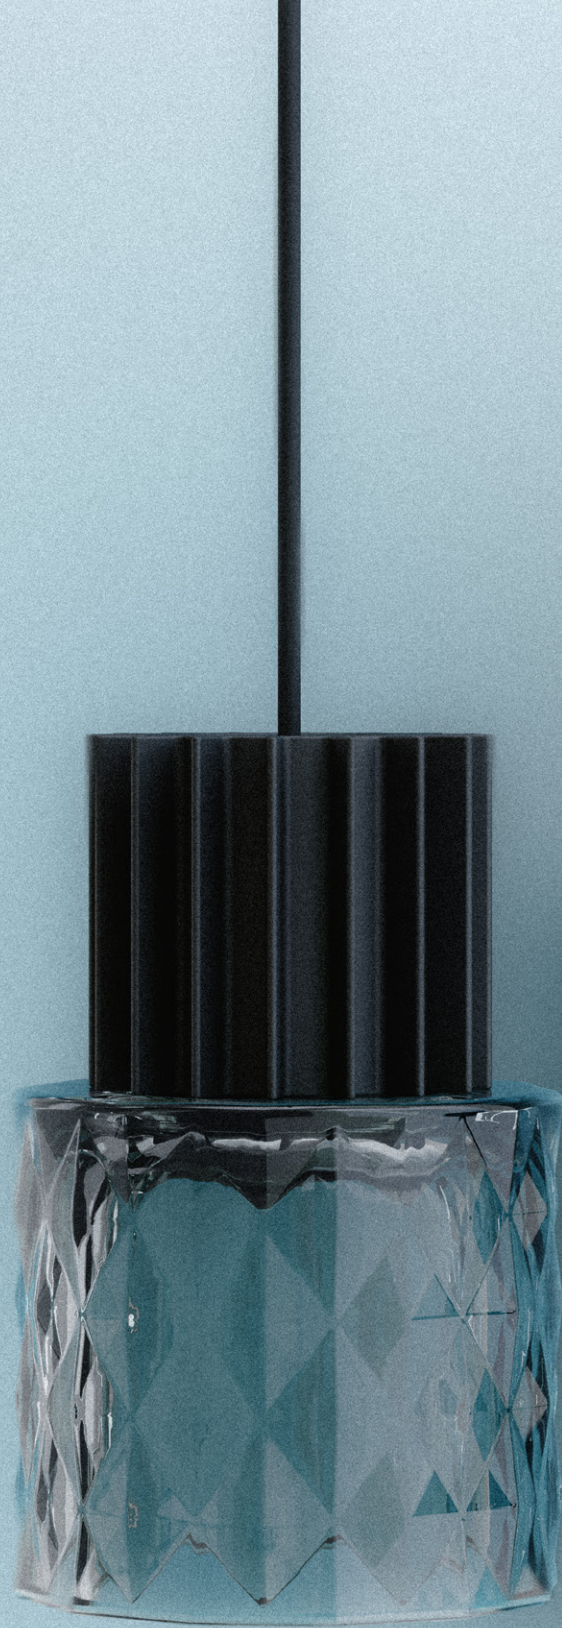

SCENT COLLECTION BY MARC SADLER

PANZERI

Scent collection brings
together two luminous
presences designed
to shape space
with quiet elegance.

Created for both domestic
and retail interiors, they diffuse
light like a subtle fragrance,
defining atmospheres
with warmth, rhythm, and
contemporary refinement.

La luce come esperienza sensoriale

Scent nasce dall'osservazione di un vuoto nel panorama dell'illuminazione contemporanea, coniugando precisione illuminotecnica e valore espressivo. Da questa intuizione prende forma una collezione che restituisce centralità al vetro, inteso come materia attiva, capace di costruire luce, atmosfera e identità.

Il nome Scent racchiude l'essenza del progetto. L'assonanza con gli iconici flaconi di profumo rimanda a un immaginario sensoriale in cui luce e fragranza condividono la stessa qualità immateriale: la capacità di lasciare un'impronta, di definire uno spazio attraverso la percezione. Come un profumo, la luce di Scent non è solo visibile, ma memorabile.

Materia e tecnologia: il vetro pressato

Alla base del progetto c'è una scelta tecnologica precisa: il vetro pressato, utilizzato per garantire resistenza, controllo e massima precisione delle forme. Questa tecnica consente di definire con grande rigore il motivo a rombi in rilievo che caratterizza entrambi i formati della collezione e che rappresenta uno degli elementi distintivi di Scent.

Il disegno della superficie non è puramente decorativo: il rilievo dialoga con la luce, ne modula la diffusione e contribuisce a creare quell'effetto di auto-illuminazione che rende il vetro protagonista anche quando il faretto è acceso. La materia diventa così veicolo di una luce stratificata, tecnica e al tempo stesso emozionale.

Light as a sensory experience

Scent was born from observing a gap in the contemporary lighting landscape, combining lighting precision with expressive value. From this insight, a collection takes shape that restores glass to a central role, understood as an active material capable of creating light, atmosphere, and identity.

The name Scent encapsulates the essence of the project. Its resonance with iconic perfume bottles evokes a sensory world where light and fragrance share the same immaterial quality: the ability to leave an imprint, to define a space through perception. Like a perfume, the light of Scent is not only visible but memorable.

Material and technology: pressed glass

At the heart of the project lies a precise technological choice: pressed glass, used to guarantee strength, control, and maximum precision of form. This technique allows for the rigorous definition of the diamond-patterned relief that characterizes both formats of the collection and represents one of Scent's distinctive elements.

The surface design is not purely decorative: the relief interacts with the light, modulating its diffusion and contributing to creating a self-illuminating effect that makes the glass a protagonist even when the spotlight is on. The material thus becomes a vehicle for layered light, both technical and emotional.

Luce controllata, presenza scenica

I faretti Scent sono progettati con grande rigore illuminotecnico: producono una luce diretta, precisa e controllata, ideale per applicazioni architettoniche. Parallelamente, il corpo in vetro si illumina delicatamente, generando un'aura soffusa che amplifica la presenza dell'oggetto nello spazio.

Questa doppia anima — funzionale e percettiva — definisce l'identità della collezione, rendendo Scent adatto sia a contesti residenziali sia a progetti contract in cui la luce diventa elemento narrativo.

Colore: uno strumento progettuale

La collezione Scent si distingue per un'ampia selezione cromatica, concepita come strumento attivo di progetto. La gamma completa comprende Trasparente, Ghiaccio, Ambra, Fumé, Verde foresta, Rosa, Caramello, Arancione, Turchese. Ogni colore interagisce con la luce in modo differente, permettendo a Scent di dialogare in maniera puntuale con il progetto architettonico e l'identità dello spazio.

Controlled light, scenic presence

Scent spotlights are designed with great lighting rigor: they produce precise, controlled direct light, ideal for architectural applications. At the same time, the glass body gently illuminates itself, generating a soft aura that amplifies the object's presence in space.

This dual nature — functional and perceptual — defines the collection's identity, making Scent suitable for both residential contexts and contract projects where light becomes a narrative element.

Color: a design tool

The Scent collection stands out for a wide chromatic range, conceived as an active design tool. The complete range includes Transparent, Ice, Amber, Smoke grey, Forest green, Pink, Caramel, Orange, Turquoise. Each color interacts differently with light, allowing Scent to engage precisely with the architectural project and spatial identity.

Pixel: la luce come composizione

Dallo stesso concept nasce Scent Pixel, una reinterpretazione del far-
retto originario che introduce un diverso sistema di illuminazione. Pixel
rappresenta l'evoluzione del progetto: un modulo pensato per costru-
ire geometrie luminose, composizioni seriali e installazioni di forte im-
patto scenografico.

Il corpo metallico funge da alloggio per l'elettronica e da so-
stegno per il paralume in vetro, mantenendo un profilo discreto per
lasciare spazio alla libertà compositiva. La luce non è più solo punto,
ma struttura, superficie, ritmo.

Marc Sadler: esperienza e visione

Il progetto porta la firma di Marc Sadler, designer di fama interna-
zionale, da sempre riconosciuto per la sua capacità di muoversi tra
sperimentazione, tecnologia e industria. Con una carriera costruita
attraverso collaborazioni con alcuni dei più importanti brand del de-
sign e una profonda conoscenza dei materiali e dei processi produt-
tivi, Sadler affronta ogni progetto come un terreno di ricerca.

In Scent, la sua grande esperienza emerge nella capacità di
sintetizzare un linguaggio formale forte con soluzioni tecniche rigo-
rose, dando vita a un prodotto che non è solo oggetto, ma sistema,
visione, racconto.

Pixel: light as composition

The same concept inspired Scent Pixel, a reinterpretation of the ori-
ginal spotlight that introduces a different lighting system. Pixel re-
presents the evolution of the project: a module designed to create
luminous geometries, serial compositions, and installations with strong
scenic impact.

The metal body performs a dual function: it houses the electro-
nic components and supports the lampshade, maintaining a discreet
profile to leave room for compositional freedom. Light is no longer just
a point but structure, surface, rhythm.

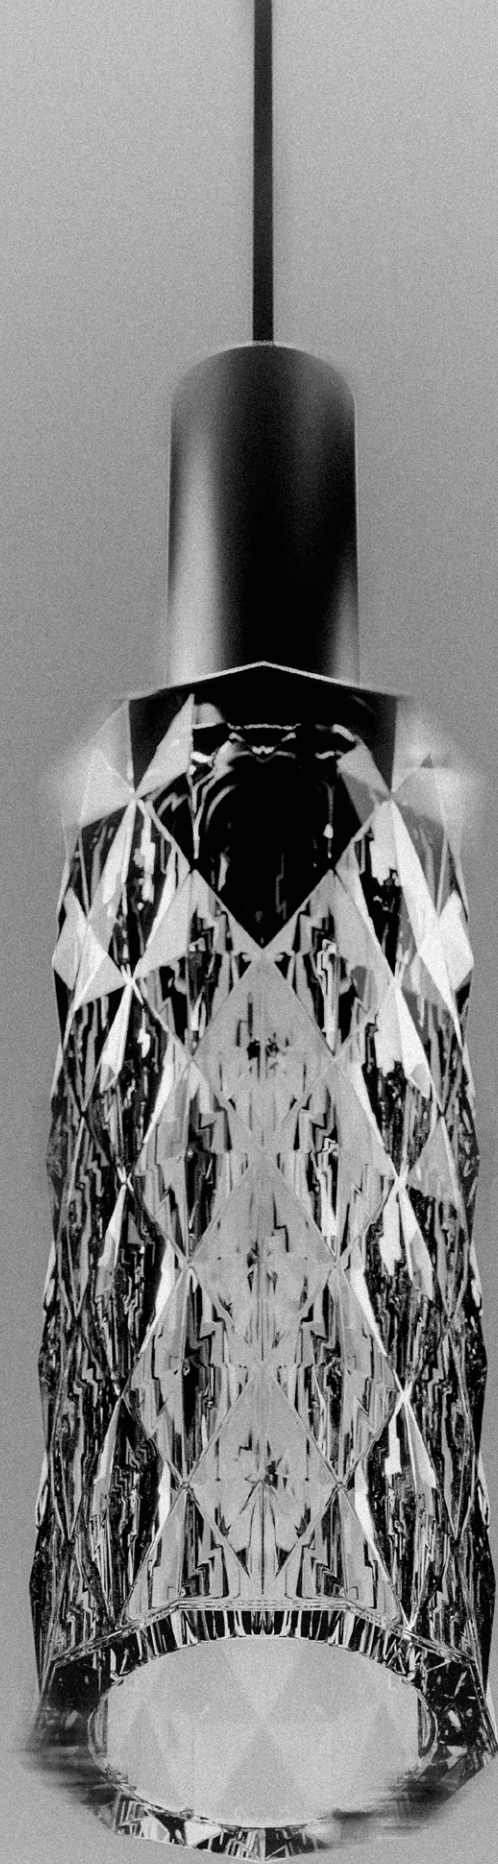

Marc Sadler: experience and vision

The project is signed by Marc Sadler, an internationally renowned de-
signer, always recognized for his ability to navigate experimentation,
technology, and industry. With a career built through collaborations
with some of the most important design brands and a deep knowle-
dge of materials and production processes, Sadler approaches each
project as a field of research. In Scent, his vast experience emerges in
the ability to synthesize a strong formal language with rigorous tech-
nical solutions, giving life to a product that is not just an object but a
system, vision, and narrative.

V09 Smoke Grey

V10 Forest Green

V16 Turquoise

Un dialogo tra vetro e metallo

Un prodotto in cui forma e materia convivono in un equilibrio di contrasti: il vetro sfaccettato, dialoga con una rigorosa struttura in metallo nero opaco. Il design, dal carattere moderno, nella versione Pixel evolve verso una sintesi ancora più essenziale, enfatizzando la purezza geometrica e la leggibilità del segno.

A matter of glass

A product in which shape and material coexist in a balance of contrasts: faceted glass, interacts with a rigorous matte black metal structure. The modern design of the Pixel version evolves towards an even more essential synthesis, emphasising geometric pureness and visual clarity.

BESPOKE CONFIGURATIONS

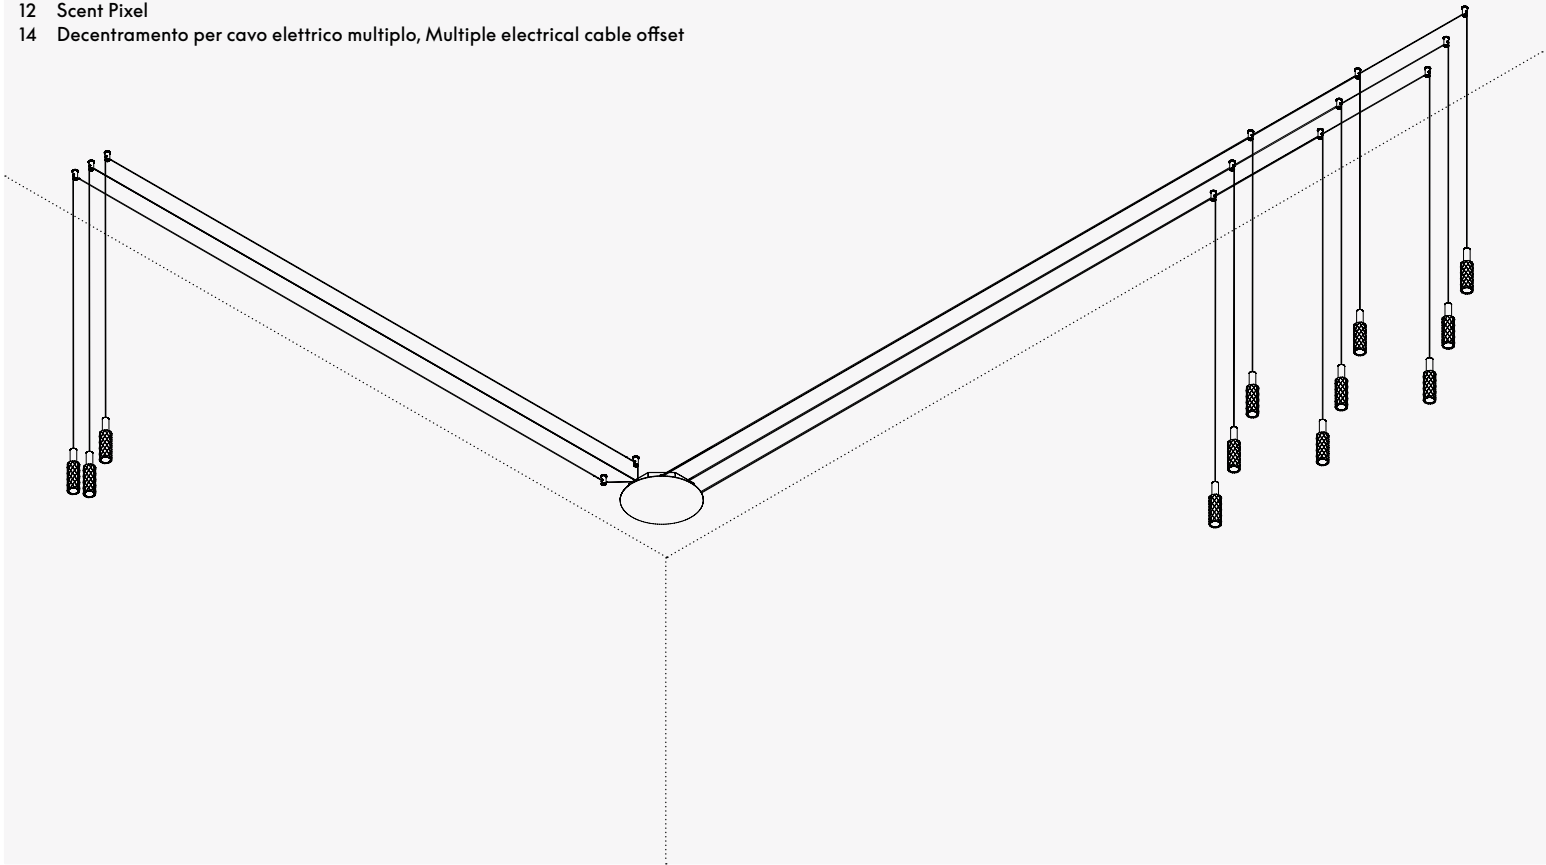

Configurazioni su misura

Le possibilità compositive della collezione sono massimizzate grazie alla versatilità del prodotto e agli accessori disponibili. Scent Pixel diventa un elemento di personalizzazione totale che dialoga con l'architettura, disegna gli spazi e ne organizza le funzioni.

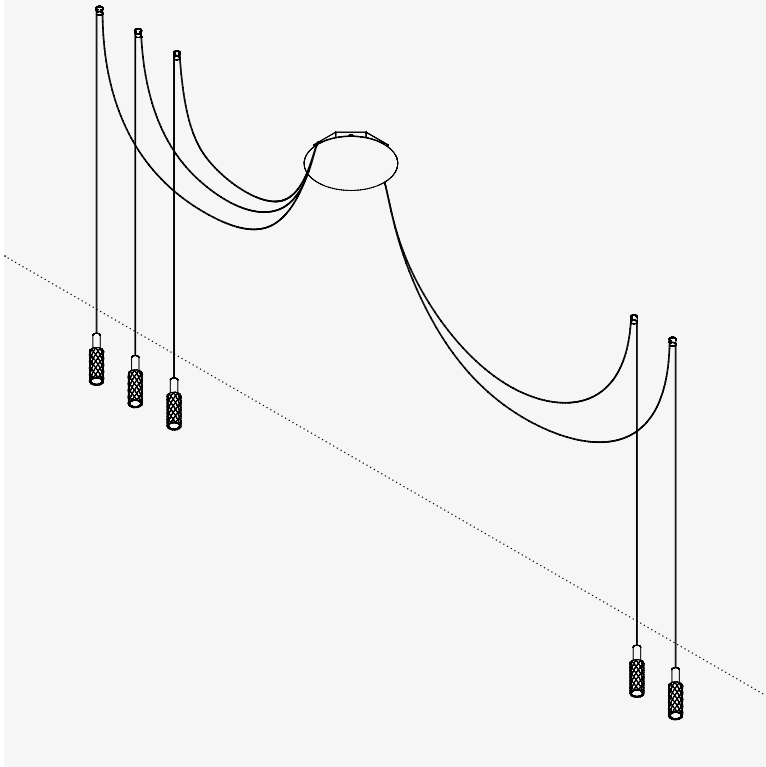

Bespoke configurations

The collection's compositional possibilities are maximised thanks to the versatility of the product and the accessories available. Scent Pixel becomes an element of total customisation that interacts with the architecture, designs spaces and organises their functions.

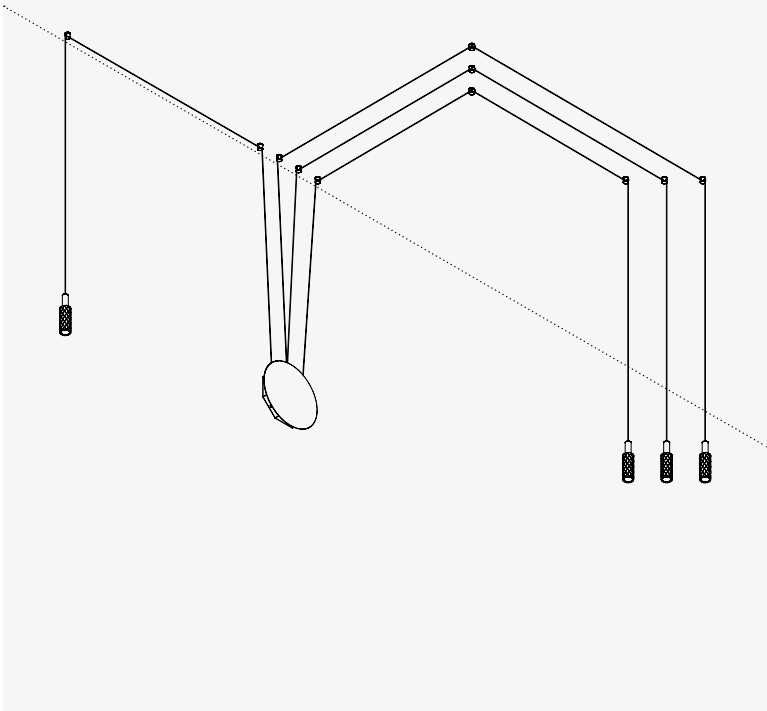

- Bespoke Configuration A
- 1 Rosone radiale, Radial canopy
 - 12 Scent Pixel
 - 14 Decentramento per cavo elettrico multiplo, Multiple electrical cable offset

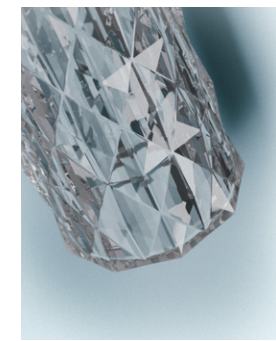

- Bespoke Configuration B
- 1 Rosone radiale, Radial canopy
 - 5 Scent Pixel
 - 5 Decentramento per cavo elettrico singolo, Single electrical cable offset

- Bespoke Configuration C
- 1 Rosone radiale, Radial canopy
 - 4 Scent Pixel
 - 11 Decentramento per cavo elettrico singolo, Single electrical cable offset

PANZERI

«Scent stems from a shared desire to transform technology into emotion, combining research, design and attention to detail».

Marc Sadler
